

#### Power supply unit terminal 24 V<sub>DC</sub> / 24 V<sub>DC</sub>, 0.1 A

The KL9560 power supply unit terminal generates an electrically isolated output voltage from the 24 V<sub>DC</sub> input voltage, which can be accessed at the terminal. The following Bus Terminals are also supplied with this voltage via the power contacts. The power LEDs indicate the operating state of the terminal. The input voltage and the output voltage of 500 V are electrically isolated.
