Declaration on California Proposition 65 for Beckhoff Automation Products

California Proposition 65 ("Prop 65") requires the inclusion of a clear and reasonable warning before knowingly exposing Californian consumers to products that contain chemicals listed by the State of California as causing cancer, birth defects or other reproductive harm, if the exposure to such listed chemicals is above certain limits set by the State of California.

Beckhoff Automation manufactures products that may contain Prop 65 listed chemicals in interior components. Such components are fully encapsulated inside a sealed housing and no exposure routes, such as dermal, oral or inhalation contact, would be expected under normal circumstances of use.

We have evaluated the exposure pathways and potential for migration for our products where exterior dermal contact may occur during normal operations (e.g. Panel PCs). No exposures were identified that require the inclusion of a warning label on our products.

Best regards

Dr. Hatice Söyler
Environment and Sustainability
